# Kennedy Yung

Vancouver, BC · kennedyyung@gmail.com · LinkedIn · GitHub · Portfolio · Devpost

Full-stack engineer with two years' experience across an early-stage healthtech startup and a regulated engineering association, taking a multi-tenant HIPAA/PIPEDA platform from first commit to the App Store. **Available January 2027.**

## SKILLS

- **Languages:** C#, TypeScript, JavaScript, SQL, Java, HTML/CSS
- **Frontend:** React.js, Next.js, React Native, Flutter, TailwindCSS
- **Backend:** Node.js, .NET / ASP.NET Core MVC, REST APIs, third-party API integration
- **Databases & Cloud:** MSSQL, MongoDB, relational schema design, AWS (Amplify Gen 2, Lambda, DynamoDB, Cognito, AppSync, S3)
- **AI:** Claude Code, Cursor, Kiro CLI; LLM integration, speech-to-text pipelines
- **3D & Games:** Unity (C#)
- **Development Practices:** Git, code reviews, Agile/Scrum, CI/CD, automated testing (Vitest, Playwright), debugging

## EXPERIENCE

### Founding Engineer — Boon Movement
Vancouver, BC | Jan 2026 – Present

- Joined as the first engineer and serve as primary developer on a 2-person team, building and shipping full-stack features for a multi-tenant B2B SaaS platform now serving 20+ clinics and 800+ clients, using React, Next.js, TypeScript, and AWS
- Built the AI pipeline that converts a practitioner's spoken coaching into a structured exercise program, chaining speech transcription with LLM extraction of exercise names, sets, reps, and cues to replace manual program entry
- Own feature development end-to-end, turning product requirements into implementations, integrating APIs, and shipping to production
- Design relational data models and implement role-based authentication and MFA workflows using AWS Cognito to meet regulated-industry access-control requirements
- Develop and integrate REST APIs and third-party services, including Stripe subscription billing and automated lifecycle email workflows
- Package, code-sign, and release the iOS application through TestFlight and the App Store, owning the distribution pipeline
- Own the company website end to end in Next.js — component architecture, responsive layouts, accessibility, and SEO/performance tuning, shipping from Figma to production

### Information Systems Intern — Engineers and Geoscientists BC
Vancouver, BC | Jan 2025 – Dec 2025

- Designed and delivered a C#/.NET MVVM WPF desktop application to production as an MSI installer, streamlining internal document workflows
- Built a C#/.NET Core MVC Outlook add-in integrating DocuShare and internal document uploads through REST APIs, eliminating an annual third-party licensing cost
- Migrated enterprise applications from C# MVC to React.js, developing reusable components to reduce duplicated code
- Designed relational data models and wrote optimized SQL queries against enterprise SQL Server databases

### Co-Lead & Software Engineer — UBC BEST Design Team (M2M)
Vancouver, BC | Oct 2023 – May 2026

- Developed interactive game mechanics and gameplay logic in Unity using C# for a gamified rehabilitation platform supporting patients with neuromuscular disorders
- Co-led system architecture and software development for a modular rehabilitation gamepad, coordinating a cross-functional team of 15 through design reviews and delivery
- Established a reusable React Native component library and led the migration of a mobile application to Flutter, improving cross-platform runtime performance

### Front-End Web Developer Intern — UBC Faculty of Applied Science
Vancouver, BC | May 2024 – Dec 2024

- Revamped 5+ websites using PHP, TailwindCSS, Node.js, and Drupal, ensuring responsive behaviour across devices
- Worked in Agile sprints and code reviews, introducing a feedback loop that cut review turnaround from 3 days to 1

## PROJECTS

### Klarity — Hack the North 2025, "Amazon Runner-Up", Sept 2025
*Next.js, React, Python, AWS (DynamoDB, DynamoDB Streams, Lambda), Gemini API, Vercel*

- Built an AI-powered inbox assistant using the Gemini API to extract deadlines, amounts, and priorities from incoming email, streaming live summaries to a dashboard via DynamoDB Streams and Lambda
- Designed the event-driven storage architecture and IAM policies, with robust parsing across HTML, PDF, and plain-text email

## EDUCATION

### University of British Columbia — Bachelor of Science, Major in Mathematics
Sept 2021 – May 2027 (Expected)

- Coursework complete Dec 2026; degree conferred May 2027
- Relevant coursework: Algorithms, Software Construction, Databases, Computer Systems, Machine Learning
